

Pear Agronomy Release Notes

April 2026

Pear Agronomy Release Notes

We're pleased to introduce the latest update to Pear Agronomy, our specialised platform built to support you in making informed, data-driven decisions. This release includes a series of updates and changes aimed at maintaining and evolving the platform. Below is a summary of what's included in this release.

Excel Exports – additional Excel export functionality to allow data to be exported for use outside the system. These are as follows – client data, crop area, crop summary, field diary, product usage, seed plan, seed requirements, spray actuals. (Improved usability)

The screenshot shows an Excel spreadsheet with the following data:

Field Name	Variety	Gross Area (ha)	Crop Area (ha)	Totals (ha)
The Sales Data Farm				
Barn Field	Skyfall	5.43	5.43	
House Field 1	Skyfall	6.11	6.11	
Middle Field 1	Skyfall	4.48	4.48	
Mount 1	Skyfall	6.00	6.00	22.02
Totals		22.02	22.02	

General – Node.js packages updated to ensure continued security, compatibility and platform stability. (Core development)

Fertiliser Module – it is now possible to adjust fertiliser rates for a range of selected fields at the same time within the Fertiliser Planner, reducing the need for repetitive updates. (Improved usability)

ADJUST RATES

Crop Fertiliser Descriptions

Description *

Reports

- Various amendments and refinements made to reports to improve clarity and presentation. (Improved usability)
- Amendments made to nMax Reports to improve accuracy and usefulness of the information displayed. (Improved usability)
- Crop Details Report updated with refinements to the data shown. (Improved usability)

Spray Recommendations – a SafeCheck passed/failed indicator is now shown on the Spray Recommendations list for quicker identification of compliance status. (Improved usability)

Sprays Recommendations GEOLOGIA CLEAR SESSION NEW

<input type="checkbox"/> Status	Visit Date ↓	Recommendation Number	Recommendation Name	Crop Types	Sprays	Fields	Order Note	Safe Check
<input type="checkbox"/> Approved	18/02/2026	TST00006	WW T2	Winter Wheat	Uniqq	Middle Field 1, Mount 1	-	✓
<input type="checkbox"/> Complete	18/02/2025	TST00005	Pre-em WW	Winter Wheat	Roundup Blactive	Barn Field, House Field 1	-	✓
<input type="checkbox"/> Approved	01/10/2025	TST00004	Pre-em WW	Winter Wheat	Roundup Blactive	Barn Field, House Field 1, Middle Field 1, Mount 1	-	✓

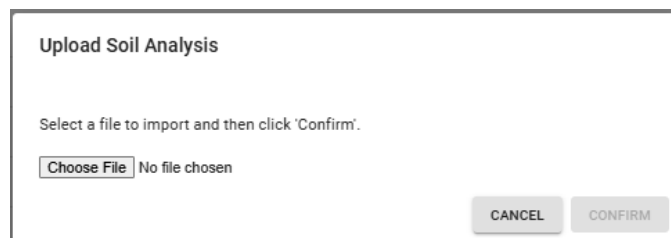

Planting – added a copy continuous option to planting records to speed up data entry when recording similar operations. (Improved usability)

Client Groups – clients can now be grouped together so they can be linked for reporting purposes. (Improved usability)

Soil Analysis – soil analysis data can now be imported from files supplied by NRM, reducing manual data entry. (Improved usability)

Excel Exports – automatic checks added to Excel exports to prevent invalid characters in sheet names and enforce maximum sheet name lengths. (Improved usability)

Spray Recommendations – duplicate sprays have been removed from the archive list and an issue causing them to be created has been resolved. (Bug fix)

Import fields – basic Excel import added to allow farms, fields and cropping to be imported in spreadsheet format. Please contact support if this functionality is required. (Improved usability)

Fertiliser Module – a fertiliser disclaimer can now be added to client details and fertiliser reports for consistency with compliance documentation. (User suggested improvement)

Company/Your Disclaimer (printed at the bottom of fertiliser plan reports)

General – various refinements throughout. (Improved usability)

If you have any questions about this release or need assistance, please don't hesitate to contact our support team. We're here to help and ensure you get the most out of Pear Agronomy.
